Elation Professional Showcasing DiGidot C4 Advanced LED Driver at InfoComm Show

Elation Professional is showcasing the DiGidot C4 LED Driver at **Elation Booth 7345/7243** at the InfoComm show in Orlando, Florida. The DiGidot C4 is a small and powerful LED controller that has use in all kinds of applications. One device can drive more than 6000 single LEDs.

“Elation is proud to be showcasing the North American debut of DiGidot on our booth,” stated Elation Professional Sales Director Eric Loader. “DiGidot is one of the most advanced LED pixel tape drivers on the market today. It offers the latest technology for integration into a variety of LED pixel tape projects and runs all pixel tapes on the market, including the Elation Flex Pixel range.”

The DiGidot C4 is an in-house development of DiGidot, based in Amsterdam, the Netherlands. It works as a pixel controller, ArtNet node, show recorder and trigger device and can work standalone for smaller setups or collaborate in larger networks with third-party devices.

Whereas users previously needed one or more ArtNet to DMX nodes in combination with a large number of DMX to SPI decoders to control a large number of LED pixel lights, the DiGidot C4 driver allows for easier configuration by daisy chaining through a built-in Ethernet switch. This means fewer devices, less cabling and less installation time.

A built-in show recorder records up to 8 DMX universes, making the DiGidot C4 perfectly suited for applications in theme parks, museums, retail shops and architectural. It works with a variety of protocols and an intuitive app and web-based user interface make for convenient operation.

More information on the DiGidot C4 can be found at www.digidot.eu or at Elation Professional Booth 7345/7243 at InfoComm in Orlando (June 14-16).

About Elation Professional

Elation Professional is one of the world’s leading lighting and visual solutions providers and is the global brand of Elation Lighting. Founded in 1992 and headquartered in Los Angeles, with European sales, distribution and support based in The Netherlands, Elation designs and manufactures a comprehensive range of innovative yet affordable lighting and video products that are distributed through a global network of dealers and distributors. Made up of a spirited team of dedicated personnel, Elation is setting new efficiency and performance standards in Platinum lamp and LED technology and is acknowledged for a comprehensive commitment to Total Support.
