## **Elation Professional EZ4 LED Display Panel – High Resolution Video at its Finest!**

The EZ4 from Elation Professional is a high-quality, 4mm pixel pitch LED video panel and the highest resolution LED panel offering in Elation's expanding line of affordable LED displays.

Designed for indoor use in installations, broadcast environments, corporate productions, car shows and more, this light weight yet sturdy panel is ideal when outstanding high-definition image quality is required.

Black face LEDs ensure high contrast while a high density of 10,816 pixels (104 x 104) per panel ensures a clear and sharp picture. Colors display vivid, consistent and uniform, and a brightness level of 1,200 Nits means the EZ4 performs well even in high ambient lighting conditions.

A high-precision die-cast aluminum frame produces a flat and seamless video display and professional-grade features like modular rigging and design options allow users to easily and flexibly rig or floor mount the unit. The slim panels measure 19.7" x 19.7" x 2.9" (500mm x 500mm x 75mm) and are low weight at 22 lbs. (10 kg) for easy transport and one-man handling.

The EZ4's fan-less design uses convection cooling to dissipate heat effectively and the lack of fans means no noise, less cleaning, and greater reliability. Quiet for use in noise sensitive environments, the EZ4 is the perfect high resolution video solution at a competitive price.
