

**FOR IMMEDIATE RELEASE**

28-Jan-2019

**Let's talk. Elation invites you to ISE Stand 12-K80**

Whether you're looking for professional lighting for an on stage production or install-quality lighting for an entertainment venue, Elation has a lighting solution to fit your need. Visit **Stand 12-K80** at the upcoming ISE Show in Amsterdam (February 5-8) to learn all about Elation's newest cutting-edge products. Visit [www.iseurope.org](http://www.iseurope.org) and register for free using Elation invitation code 707011.

Elation is excited to be showing the **RAYZOR 760™**, a compact yet powerful LED wash effects luminaire with patent-pending SparkLED™ pixel effect technology. Housing a 5 to 77-degree zoom, the RAYZOR 760 produces an intense and well-defined mid-air beam of over 8000 lumens or spreads exceptionally wide for an even wash coverage. Driven by seven, independently controlled 60W RGBW LEDs, the oversized front lenses create a large surface that is enhanced by SparkLED™. SparkLED™ consists of 28 individual white LEDs inside the lens itself to create a unique additional layer of effect. Continuous pan & tilt rotation adds another layer of dynamic effect.

The RAYZOR 760 is available in a compact and lightweight weather and dust protected IP65 version, the **Proteus RAYZOR 760™**, for use in any environment. The Proteus RAYZOR 760's multi-environmental design makes it the world's first IP65-rated luminaire with continuous pan & tilt rotation. It offers an identical feature set as the RAYZOR 760, including the SparkLED™ system.

Elation is also pleased to introduce the **Proteus Smarty Hybrid™**. This is the world's first compact CMY hybrid fixture with true IP65 rating. Encompassing the same full feature set and using the same efficient Philips MSD Platinum FLEX 200 lamp with 6000-hour lamp life as Elation's Smarty Hybrid, the Proteus Smarty Hybrid's IP65 protection means this versatile effect can be used indoors or out.

The powerful **Artiste Van Gogh™** framing wash LED luminaire features outstanding light quality and is the ideal partner to the profile luminaires in Elation's growing Artiste range. Providing up to 16,000 total lumens from an efficient 380W high CRI LED engine, the Artiste Van Gogh excels at color rendering for precise color reproduction. CMY and CTO color mixing and a 7-position color wheel provide flexible color options and an internal 4-blade barndoor system allows for beam

## FOR IMMEDIATE RELEASE

shaping and light control at any angle. With a wide zoom range and choice of PC or optional Fresnel lens, the Van Gogh is capable of concentrated beams to wide washes for use in a variety of applications that require high output and precise beam control.

Obsidian Control Systems is pleased to be showcasing the extremely powerful **NX 2™** and the portable **NX Wing™**, professional control products under the **ONYX™** lighting control platform. The NX 2 is the ultimate compact yet fully-integrated lighting controller with a slate of professional features and all the connectivity and power the ever-increasing size of shows demands. The NX Wing is the complementary USB control surface to Obsidian Control Systems' ONYX platform. Based on the NX 2 console, the NX Wing utilizes the same rugged design and components with an identical footprint and layout. Designers, programmers and operators are invited to Elation **Stand 12-K80** for a look and hands-on demo.

### **About Elation Professional**

Elation designs and manufactures a comprehensive range of innovative lighting products known for their excellent efficiency and outstanding performance.
