Elation Set to Unveil Latest Innovations in Professional Lighting at InfoComm 2026

Elation invites lighting professionals to **Booth N6245** at the InfoComm tradeshow in Las Vegas (June 17-19) to experience the latest in the company's **Rebel**, **KL**, and **Fuze** lines, as well as a range of other fixtures on display. From live events and broadcast environments to permanent installations, Elation continues to expand the creative possibilities of professional lighting with integration solutions tailored for today's diverse AV market.

Elation will showcase new luminaires in the bold [Rebel](#) line of workhorse lighting. New additions include:

[Rebel Dartz](#) – This update to Elation's popular DART'Z 360 LED beam FX fixture offers 4x the brightness, improved optics, an upgraded FX toolkit, and full all-weather protection. Its 150W RBL engine produces a tight 1.5° beam with smooth, color-mixed effects and output reaching 125,475 lux at 5 meters. A versatile gobo set, stackable prisms, and continuous pan-and-tilt deliver an energetic presence that transforms any show.

[Rebel Line 8 / 16](#) – The Rebel Line of IP65-rated linear tilt bars is driven by high-output 60W RGBL engines that produce intense, color-rich, color-tunable light. An uninterrupted linear lens system delivers a continuous beam with no breaks, while a SparkX array of 5W white LEDs

FOR IMMEDIATE RELEASE

creates unique crisscross aerals over any RGBL background. The fixtures feature fast 4°–35° zoom and 210° tilt control for dynamic aerial and wash effects.

[Rebel Wash 4 / 12](#) – These high-power wash luminaires combine rich color, high output, crisp aerial beams, and IP65-rated durability. Their 60W RGBL engines produce vivid primary colors, excellent white-light performance, a high CRI, and calibrated color temperature control. Designed for a new generation of creators, they offer flexibility and affordability without sacrificing punch.

Elation is also introducing new fixtures in the popular broadcast-quality **[KL “Key Light” Series](#)**, the ideal backbone for any production that requires pristine color rendering and durable performance.

[KL Fresnel 6 IP / 8 IP](#) – Ideal for light-critical and noise-sensitive venues, the weather-rated KL Fresnel 6 IP and 8 IP generate high-output soft light with precise color reproduction and adjustable color temperature. They combine the classic beam quality of a Fresnel fixture with modern RGBMA color control, motorized zoom, and high CRI performance.

[KL Batten 12 / 48 / 72](#) – This high-brightness line of color wash fixtures offers rich, full-spectrum color with full pixel control, a remarkably homogenized beam, and built-in CCT control. A 100W RGBMA system delivers smooth, natural light with high CRI (>94) for camera-ready color. Available in 1-, 4-, and 6-ft models with up to 71,000 lumens of output, they provide designers with color flexibility and eye-popping brightness for indoor or outdoor environments.

Designers continue to appreciate Elation’s **[FUZE Series](#)** for its exceptional blend of performance, features, and value. New to the series and showing at InfoComm is the Fuze Profile+.

[Fuze Profile+](#) – An update to the popular Fuze Profile moving head with framing, the Fuze Profile+ is built for precision lighting applications where beam control and high color quality matter. Powered by a carefully tuned 500W RGBMA LED array with high CRI and variable color control, it delivers exceptional brightness of over 12,500 lumens and is loaded with design features.

Additional highlights include:

[Six+ Panel](#): Ideal as a high-powered wash, blinder, or strobe, the Six+ Panel delivers virtually unlimited color options from 40 × 40W RGBLA+UV LEDs with exceptional light quality. Fully IP65 rated, the output is impressive at nearly 47,000 lumens! Additional features include 2×5-cell pixel control, and an optional battery for untethered operation.

[Söl I ACL](#): Elation’s groundbreaking Söl LED blinder series expands with the Söl I ACL, a modular color-changing beam fixture with the punch of a tight ACL beam. Its 150W RGBLA LED engine and ultrafast 4°–41° zoom deliver bright, saturated beams with precise color. With versatile mounting options, the Söl I ACL allows for creative integration with Söl I fixtures.

FOR IMMEDIATE RELEASE

Søl I Strobe: Also part of the Søl series, the Søl I Strobe is a compact, high-output strobe with color effects, featuring 252 cold-white and 48 RGB LEDs for a powerful 14,500-lumen output. It offers zone control, variable electronic frost, customizable strobe effects, and a fully modular design with flexible mounting and full compatibility with other Søl I fixtures.

Volt+: These next-gen battery-powered Par and Bar fixtures feature brighter RGB+Lime+Amber+UV LEDs, fully homogenized beams, IP65 durability, wireless flexibility, and optional charging/DMX bases. Perfect for mobile uplighting, accents, and creative direct-view effects.

Visit **Booth N6245** for hands-on demos, conversations with Elation product experts, and a first look at the company's latest innovations designed to inspire creative production and installation possibilities.

Magmatic and X-Laser

Join Magmatic and X-Laser at this year's InfoComm at **Booth N6251** and get an exclusive look at the latest advancements, from next-gen atmospheric effects that transform stages to laser systems that captivate audiences. Whether you're designing immersive spaces, enhancing broadcast productions, creating unforgettable corporate experiences, or elevating permanent installations, our team will be on-site to show how professional fog, haze, snow, CO₂ effects, and laser technology can help bring your creative vision to life.

About Elation

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and production/rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of dependable specialty effects called Magmatic. Elation serves clients worldwide through offices in Los Angeles, Mexico City, Canada, and the Netherlands. We invite you to take a closer look at elationlighting.com
