FOR IMMEDIATE RELEASE IMMEDIATE RELEASE

26-Aug-2022

Latest Elation Proteus™, Fuze™ and KL™ products to show at PLASA 2022

Elation and UK partner Entedi welcome lighting professionals to Stand E-14 at Olympia London

Elation is proud to partner with Entedi Ltd. in the UK and is excited to team with the technology equipment solutions provider to present an exceptional line-up of new lighting tools September 4-6 at the PLASA tradeshow at Olympia in West London. Visitors to **Elation/Entedi Stand E-14** will be some of the first in the UK to demo the latest cutting-edge luminaires in Elation's industry leading IP65 **Proteus™**, high-performance/high-value **Fuze™**, and broadcast-optimized **KL™** ranges.

Highlights include the **Proteus Excalibur™**, the brightest IP65 full-featured beam fixture ever created which has already seen service on several high-profile shows, plus the 70,000-lumen **Proteus Brutus™** LED wash. The **Proteus Rayzor Blade™**, a combination linear wash and FX light, and **Proteus Rayzor 1960™**, a compact yet powerful LED wash effects luminaire, will also be available to demo.

Elation's new **Fuze MAX Profile™** full-color LED moving head has garnered a lot of attention since debuting at the Prolight + Sound show in April as has the new **KL Panel XL™**, a bigger, brighter and bolder version of Elation's popular color temperature-adjustable, full-spectrum KL Panel™ LED soft light. Both will be available for close inspection as will the new **KL Fresnel 6 FC™**, a full-color soft light in Elation's KL "Key Light" series.

The Elation/Entedi team looks forward to a great PLASA and welcomes lighting professionals to **Stand E-14** for a closer look at these exciting innovations and much more.

Proteus Brutus™: The Proteus Brutus is an extraordinarily powerful 70,000-lumen LED wash fixture with IP65 rating designed for piercing beam looks and high-intensity washes in any environment. A high efficiency 1200W 6,500K white LED engine works with CMY color mixing, variable CTO and 6-position color wheel while a complete FX system features rotating gobos, animation, iris, and frost. An optional indexable framing module is also available. With a zoom range from 4° to 45° and an impressive 220mm front lens, the Proteus Brutus cuts through at great distances.

FOR IMMEDIATE RELEASE

Proteus Excalibur™: The Proteus Excalibur is a stunningly powerful IP65 beam moving head set to assume the role as the new 21st Century searchlight. With extreme power (20,000 lumens), super narrow 0.8° beam (3.5° Expander Lens available), and wide front aperture, it excels at creating aerial light beams, throws of CMY color, and air FX rivaling Xenon searchlights. It houses a wide array of gobos (25), prism overlays (4- and 8-facet) and more. The Excalibur uses Philips' highly-efficient Flex lamp technology for long lamp life, lower power consumption and reduced fixture maintenance.

Proteus Rayzor Blade™: The Proteus Rayzor Blade is a combination of linear wash, high-intensity strobe line and SparkLED FX inside a compact IP65 linear fixture design. Available with 6 or 12 independently controlled 60W RGBW LEDs, Proteus Rayzor Blade provides well-defined mid-air beams up to 12,500 lumens or exceptionally wide and even wash coverage. Two high-intensity strobe lines of cool white LED dots along with Elation's exclusive SparkLED™ effects add depth and visual impact. Wide zoom and dynamic tilt axis add to its visual flexibility.

Proteus Rayzor 1960™: This compact yet extremely powerful LED wash effects luminaire with 5.6 to 44-degree zoom projects intense, well-defined mid-air beams, as well as an exceptionally wide and even wash coverage. Driven by 19 independently controlled 60W RGBW LEDs, the Proteus Rayzor 1960 provides a powerful beam (over 17,000 lumens) that stands out on any stage. The oversized front lenses create a large surface enhanced by Elation's SparkLED™ technology for a unique additional layer of effect. Continuous, speed-adjustable pan & tilt rotation adds another layer of dynamic effect from this versatile fixture.

Fuze MAX Profile™: The Fuze MAX Profile is a 21,000-lumen full-spectrum LED framing fixture designed for theater, television and a wide array of other precision lighting applications. It houses an 800W RGBMA LED engine (92 CRI) that rivals 1000W/1200W class discharge fixtures. It houses a full blackout framing system with four rotating blades and +/- 60 degree indexing. Useful wherever a wide chromatic spectrum (including dynamic whites) and outstanding quality is required, other features include a rotating gobo wheel, fixed gobo wheel, animation wheel, dual frost, prism and iris in a quiet and extremely powerful automated framing fixture.

KL Panel XL™: Designers have turned to Elation's color temperature-adjustable KL Panel™ full-color-spectrum LED soft light for livestreams and broadcasts of all types and now the company offers an XL version that extends the size of the original while emitting nearly twice the power and offering multi-zone control for dynamic effects. The new KL Panel XL soft light delivers superior output, precise color temperature control, full-spectrum color rendering and an even wash coverage. Optimized for the tunable white light requirements of broadcast, it is an ideal soft light source for many situations requiring outstanding performance and color quality.

KL Fresnel 6 FC™: The KL Fresnel 6 FC is a full-color soft light optimized for light critical and noise sensitive venues like broadcast and theatre. It is an ideal key and fill light source that

projects a uniform wash of soft field light across the full color spectrum, including dynamic white light. It houses a highly efficient 220W RGBMA LED engine and produces up to 8,000 field lumens. A 10 to 32-degree zoom and 8-leaf barn doors allow for customized shaping of the beam.

About Elation Professional

Based in California with facilities in Florida and Mexico City, as well as European offices in The Netherlands, Elation designs and manufactures a comprehensive range of innovative lighting products known for its superior performance, excellent efficiency, and outstanding price:value ratio, all backed by a hard-earned reputation for Total Support. Elation also offers an advanced line of lighting control products through Obsidian Control Systems, as well as a full range of dependable specialty effects called Magmatic. Our mission has always been simple: to provide best-in-class products and service while offering the best value:performance ratio in the industry. Elation products continue to be a part of the industry's most exciting projects across the globe. We invite you to take a closer look at www.elationlighting.com
