FOR IMMEDIATE RELEASE

18-April-2022

Elation World Premiere Proteus™, Fuze™ and KL™ products await visitors to Prolight + Sound

Elation anticipates joyful industry reunion in return to global entertainment technology trade show April 26-29 in Frankfurt

The wait is over! Elation is excited to be returning to the Prolight + Sound show to do what we enjoy best – working face to face with industry professionals to successfully realize their lighting projects. We look forward to seeing you April 26-29 at **Hall 12.1-B49/C49** in Frankfurt – in person! Elation is proud to partner with LMP to distribute Elation products in Germany.

VISIT US!
Hall 12.1 B49, C49

prolight+sound
26. – 29. 4. 2022, Frankfurt am Main

The banner features a collection of Elation lighting fixtures, including beam lights with blue and green outputs, and moving heads with orange and blue outputs. Below the fixtures is a row of logos: Elation Professional, Proteus, Artiste, KL, Fuze, and a stylized 'M' logo.

Be the first to check out the latest cutting-edge luminaires in Elation's industry leading IP65 [Proteus™](#) line, including the new **Proteus Excalibur™**, the brightest IP65 full-featured beam fixture ever created, plus the world premiere of the 70,000-lumen **Proteus Brutus™** LED wash! New fixtures in Elation's high-performance, high-value [Fuze™](#) series are also on the docket, including the new **Fuze MAX™** full-color-spectrum LED moving head, and the world

FOR IMMEDIATE RELEASE

premiere showing of the **Fuze Wash 500™**, a full-spectrum LED Fresnel moving head. Visitors can also get up close with new luminaires in Elation's broadcast-optimized **KL™** series, including the first ever showing of the **KL Profile FC™**, a compact, full-color ellipsoidal framing fixture, and new **KL Panel XL™**, a bigger, brighter and bolder version of Elation's popular color temperature-adjustable, full-spectrum KL Panel™ LED soft light. And there's more!

The restart is in full swing! Let's talk about how we can help you achieve your lighting vision.

Proteus Brutus™: The Proteus Brutus is an extraordinarily powerful 70,000-lumen LED wash fixture with IP65 rating designed for piercing beam looks and high-intensity washes in any environment. A high efficiency 1200W 6,500K white LED engine works with CMY color mixing, variable CTO and 6-position color wheel while a complete FX system features rotating gobos, animation, iris, and frost. An optional indexable framing module is also available. With a zoom range from 4° to 45° and an impressive 220mm (8.7") front lens, the Proteus Brutus cuts through at great distances.

Proteus Excalibur™: The Proteus Excalibur is a stunningly powerful IP65 beam moving head set to assume the role as the new 21st Century searchlight. With extreme power (20,000 lumens), super narrow 0.8° beam (3.5° Expander Lens available), and wide front aperture, it excels at creating aerial light beams, throws of CMY color, and air FX rivaling Xenon searchlights. It houses a wide array of gobos (25), prism overlays (4- and 8-facet) and more. The Excalibur uses Philips' highly-efficient Flex lamp technology for long lamp life, lower power consumption and reduced fixture maintenance.

Proteus Rayzor Blade™: The Proteus Rayzor Blade is a combination of linear wash, high-intensity strobe line and SparkLED FX inside a compact IP65 linear fixture design. Available with 6 or 12 independently controlled 60W RGBW LEDs, Proteus Rayzor Blade provides well-defined mid-air beams up to 12,500 lumens or exceptionally wide and even wash coverage. Two high-intensity strobe lines of cool white LED dots along with Elation's exclusive SparkLED™ effects add depth and visual impact. Wide zoom and dynamic tilt axis add to its visual flexibility.

Proteus Rayzor 1960™: This compact yet extremely powerful LED wash effects luminaire with 5.6 to 44-degree zoom projects intense, well-defined mid-air beams, as well as an exceptionally wide and even wash coverage. Driven by 19 independently controlled 60W RGBW LEDs, the Proteus Rayzor 1960 provides a powerful beam (over 17,000 lumens) that stands out on any stage. The oversized front lenses create a large surface enhanced by Elation's SparkLED™ technology for a unique additional layer of effect. Continuous, speed-adjustable pan & tilt rotation adds another layer of dynamic effect from this versatile fixture.

Fuze MAX Spot™ / Fuze MAX Profile™: The Fuze MAX is a 21,000-lumen full-spectrum LED moving head with RGBMA LED engine (92 CRI) that rivals 1000W/1200W class

FOR IMMEDIATE RELEASE

discharge fixtures. Available in Spot and Profile framing versions, the Fuze MAX has been designed for precision lighting applications such as theater, broadcast and Houses of Worship where a wider chromatic spectrum (including dynamic whites), a full feature set and outstanding quality is required.

Fuze Wash 500™: The Fuze Wash 500™ is a full-spectrum LED Fresnel moving head fixture designed for theater, television, events and a wide array of other precision lighting applications. It houses a 500W RGBMA LED engine and delivers a powerful output of up to 17,000 lumens with CRI of 92. It is designed for any application where an automated Fresnel fixture with outstanding and impactful colors, a wide zoom range and a soft field of light is required.

Fuze Pendant Compact™: Elation adds to its leading line of dynamic pendant luminaires with the new Fuze Pendant Compact, an energy-efficient downlight intelligent enough to adapt to any environment and small enough to fit into a huge variety of spaces. Housing a full spectrum 144W RGBWL LED array, it produces beautiful colors as well as high CRI variable white tones. Color temperature adjustment is from 2,400 - 8,500K. Convection cooled for absolute silence, a variety of mounting options and lens choices allow for precise light distribution.

KL Profile FC™: The KL Profile FC™ is a compact ellipsoidal framing fixture with 305W RGBMA LED engine designed for a wide array of precision lighting applications. With a 7 to 50-degree zoom, the fixture requires no additional lens tubes, reducing cost, complexity and providing excellent flexibility for any theater or performance venue. Included is a 16-bit rotating gobo slot and full blackout framing system with a Fresnel wash conversion kit available as an option. Output exceeds 10,000 lumens.

KL Panel XL™: Designers have turned to Elation's color temperature-adjustable KL Panel™ full-color-spectrum LED soft light for livestreams and broadcasts of all types and now the company offers an XL version that extends the size of the original while emitting nearly twice the power and offering multi-zone control for dynamic effects. The new KL Panel XL soft light delivers superior output, precise color temperature control, full-spectrum color rendering and an even wash coverage. Optimized for the tunable white light requirements of broadcast, it is an ideal soft light source for many situations requiring outstanding performance and color quality.

KL Fresnel 6 FC™: The KL Fresnel 6 FC is a full-color soft light optimized for light critical and noise sensitive venues like broadcast and theatre. It is an ideal key and fill light source that projects a uniform wash of soft field light across the full color spectrum, including dynamic white light. It houses a highly efficient 220W RGBMA LED engine and produces up to 8,000 field lumens. A 10 to 32-degree zoom and 8-leaf barn doors allow for customized shaping of the beam.

About Elation Professional
