

FOR IMMEDIATE RELEASE IMMEDIATE RELEASE

12-June-2019

New Elation lighting solutions to show at Stage|Set|Scenery

Elation Professional is joining with German distribution partner LMP at Stage|Set|Scenery in Berlin, **Hall 20, Stand 325**, where the latest luminaires in the award-winning Artiste series will be on display along with KL series LED Fresnel lights and the new NX 2™ lighting console from Obsidian Control Systems.

Taking place June 18 to 20 at Messe Berlin, Stage|Set|Scenery is one of the top European trade shows for theater, film and event technology and the ideal medium to show the latest Artiste series theatrical grade moving heads. On display will be the 45,000-lumen **Artiste Monet™**, a full-featured LED Profile offering outstanding projection quality, a comprehensive FX package, dynamic framing and an innovative SpectraColor engine that produces the most vibrant primary colors ever produced by a color mixing system.

Also showing is the **Artiste Picasso™**, one of the brightest (23,000 lumens) and most feature-rich profile LED lighting fixtures available. Feature-packed (zoom, framing, CMY, CTO, gobo wheels, animation, prisms, frost and more), a 620W LED engine combines with advanced optics to produce a crisp yet uniform output while staying whisper quiet. The state-of-the-art **Artiste Van Gogh™** will also show. This LED Wash luminaire with internal framing excels at color reproduction for color projections of the highest quality. Housing CMY and CTO color mixing as well as a 7-position color wheel, it offers a choice of PC or Fresnel lenses and is the ideal partner to the profile luminaires in the Artiste range.

Other dedicated theater and installation luminaires on display will be the **KL Fresnel™** line of warm- and cold-white key lights. KL Fresnel lights are also available as pole operable units for broadcast studio and theatre applications.

As a theater-ready lighting console, LMP presents the new **NX 2™** from Obsidian Control Systems. The NX 2 is a compact yet powerful fully-integrated lighting control system. As part of Obsidian

Control Systems' innovative ONYX platform, it offers a wealth of features including a bright, full-HD, multi-touch screen, eight assignable parameter encoders, a supportive mini-touch screen, a full keyboard and command panel, a dedicated master button and ten playbacks with four assignable buttons.

The LMP and Elation team look forward to a great show and invite lighting professionals to **Hall 20, Stand 325** for a chat and a personal demo. Interested professionals can make an appointment in advance by calling +49 5451/59 00-800 or by e-mail at sales@lmp.de.
