

FOR IMMEDIATE RELEASE

10-Sept-2019

Creative Lighting Solutions from Elation at WFX 2019

Dynamic lighting systems are being used by houses of worship across the country in new and exciting ways to support the message and help grow congregations. Elation partners with houses of worship large and small to develop creative lighting solutions that engage with worshipers and help pack the pews. We invite you to **Booth 718** at the **WFX** show in Orlando to talk about bringing your ministry to the next level.

Join the Elation team September 17-19 at the Orange County Convention Center where we'll have on display some of our latest lighting innovations for hands on demonstrations. Elation is pleased to be expanding the popular Fuze™ series of LED wash luminaires with new profile, spot and pendant versions. Showing will be the **Fuze Spot™** and **Fuze Profile™** with framing, both housing full-color-spectrum RGBMA color mixing systems. Also available is the cold white **Fuze Profile CW™** with dual color wheels. All three automated LED moving heads offer the perfect fusion of performance, features and value.

Elation is also pleased to show for the first time the **Fuze Pendant™**, a full-color-spectrum house lighting solution with high CRI, smooth dimming and up to 11,000 lumens of power that is ideal for large area illumination and high ceiling applications while compact enough to easily fit in smaller spaces. Pendant, yoke or recessed ceiling hardware provide for flexibility in mounting; DMX, 0-10V and emergency battery connection support any connectivity requirements, while a variety of lens accessories allows for precise light distribution.

Also showing is the **Smarty MAX™**, an extreme-output Spot/Beam/Wash hybrid moving head featuring a new Platinum FLEX 400 lamp rated at 480W with up to 4,000 hours of smart lamp life. Combining CMY and variable CTO, this is the world's first hybrid incorporating a full iris for dynamic beam effects. Compact and lightweight with a large 160mm front aperture lens, its resourceful design package includes four prisms on two planes, dual frosts plus dual gobo wheels and dual track animation.

FOR IMMEDIATE RELEASE IMMEDIATE RELEASE

Obsidian Control Systems is pleased to be showing the new **NX 4™** lighting console with **DYLOS™** pixel composition engine. Equipped with a range of professional features and using the latest in industrial components, the NX 4 is designed to handle even the largest show with ease while DYLOS aims to provide new and innovative ways that far exceed the capabilities of regular pixel-mapping systems.

About Elation Professional

Based in California with a European office in The Netherlands, Elation designs and manufactures a comprehensive range of innovative lighting and video products known for its superior performance, excellent efficiency, and outstanding price:value ratio, all backed by a hard-earned reputation for Total Support. Through nearly three decades of intelligent lighting development, our mission has always been simple: to provide best-in-class products and service while offering the best value:performance ratio in the industry, helping show designers and producers achieve their vision. From discharge to LED, intelligent to conventional, Elation products continue to be a part of the industry's most exciting projects across the globe and our list of references is always growing.
