## Elation Launches FUZE PFX: A Compact Powerhouse for Profile and FX Lighting

Designers continue to appreciate Elation's [FUZE](#) series for its exceptional blend of performance, features, and value. The newest addition, the [FUZE PFX](#), brings all the power and versatility of a multi-purpose automated fixture — now in an incredibly compact footprint. Designed to deliver serious output and feature-rich flexibility in a smaller package, the FUZE PFX is ideal for both production and installation environments where space and performance matter.

Ideal for applications that demand a high-output, multifunctional light, the FUZE PFX combines the precision of a profile fixture with the creative potential of an effects light. It delivers over 15000 lumens of output and can handle everything from tight beams and precise framings to expansive washes.

### **Punches Above Its Size**

Despite its feature-packed design and powerful 400W white LED engine, the FUZE PFX maintains a compact and lightweight form factor, making it an ideal choice for venues where rigging space is limited or portability is essential. It's a true workhorse that punches well above its size — perfectly suited for fast-paced productions, touring rigs, and discreet installations alike.

### **Full Feature Set**

## FOR IMMEDIATE RELEASE

The FUZE PFX includes 18 finely crafted gobos (7 rotating and 11 fixed) and a versatile zoom range from 3° to 53°, enabling stunning mid-air effects and crisp image projections. Its two variable frost filters (Light and Wash) allow for beautifully even stage washes, while the seamless CMY color mixing with linear CTO correction provides a broad and vibrant color palette. An 8-position color wheel features high CRI filters (80, 90) and a UV filter for additional flexibility.

The rotatable full-blackout framing blades offer precise beam shaping, making it easy to isolate areas on stage, highlight scenic elements, or produce dynamic mid-air visuals. Dual independent rotating prisms (6-facet linear and 6-facet round) can be used together for layered effects, while a fast iris and the unique split CMY SFX wheel expand the creative toolkit. Additional features include a high-speed electronic shutter, strobe, and multiple 16-bit dimming curve modes for smooth programming.

### **For Any Environment**

With its impressive output and whisper-quiet operation, the FUZE PFX is exceptional for various environments, including theaters, TV studios, and houses of worship. It also comes fully equipped with the professional control features today's designers expect from a state-of-the-art luminaire.

Elation's FUZE series continues to offer lighting professionals a compelling choice in compact, feature-rich LED automated fixtures. The FUZE PFX stands out as a true multi-functional powerhouse — delivering striking effects, precise projections, and brilliant washes across any stage.

### **About Elation**

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of dependable specialty effects called Magmatic.
