

FOR IMMEDIATE RELEASE

14-Jan-2026

Elation FUZE WASH 250 Now Shipping: Velvety-Smooth, Full-Spectrum Soft-Field Lighting

Elation proudly expands its FUZE family of high-performance/high-value lights with the **FUZE WASH 250**, a punchy, full-spectrum LED Fresnel moving head built to deliver a beautifully crafted, ultra-smooth wash in theaters, studios, event spaces, and wherever designers demand it. Compact, powerful, and ready to perform, it's shipping now.

Brilliant Full-color Performance

The compact companion to the powerful FUZE WASH 500, the FUZE WASH 250 delivers the velvety, homogenous field that lighting pros rely on to make performers and scenery look their best. Its 92 CRI, 250W RGBMA LED engine provides the same premium color quality found across the FUZE and KL Series for a perfectly calibrated color match.

The RGBMA engine, calibrated at a native color temperature of 6500 Kelvin, produces bold yet beautifully diffused saturates, soft-field pastels, and a refined range of tunable white light. The carefully tuned LEDs ensure accurate color reproduction both to the eye and to the camera while delivering a powerful output of up to 8,500 lumens. Remarkably silent, it can be used in any noise-sensitive environment, from intimate theaters to broadcast environments.

Color Management

Fine-tune every look with green/magenta shift, a virtual gel library, and precise color correction from 2400K–8500K. Capable of matching camera white balance, users can easily shift the color temperature without the use of plus/minus green gels or filters. CMY and RGB emulation modes support familiar programming styles, while an adjustable LED refresh rate keeps on-camera performance flicker-free, even for high-speed capture.

Flexible Beam, Flawless Dimming

A motorized zoom from 6° to 50° allows easy adjustments from tight beams to wide washes, while an included snoot provides even tighter control of the beam. Smooth 16-bit dimming curves and a high-speed electronic shutter/strobe provide nuance and punch for further impression.

FOR IMMEDIATE RELEASE

Compact and lightweight yet built to endure on-the-road handling or years of service in a permanent installation, the FUZE WASH 250 creates beautiful bright washes on any stage, delivering reliable performance with all the longevity and low-maintenance perks of LED technology.

About Elation

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of dependable specialty effects called Magmatic. Elation serves clients worldwide through offices in Los Angeles, Mexico City, and the Netherlands. We invite you to take a closer look at elationlighting.com
