Elation Fuze Profile+ Combines Profile and Fresnel Wash Roles in One Adaptable Fixture

Elation is pleased to offer **Fuze Profile+**, a high-output LED framing profile luminaire that combines the capabilities of a full-featured Profile and a true Fresnel Wash in one adaptable platform. With intelligent Lens Swap, powerful RGBMA color, and a comprehensive framing and effects system, Fuze Profile+ delivers two essential fixture roles without compromising creative capability.

One Fixture. Two Roles. No Compromise.

Professional lighting inventories have traditionally required dedicated fixtures for Profile and Fresnel Wash applications. Fuze Profile+ changes that equation by making adaptability a property of the fixture rather than the inventory.

Fuze Profile+ is designed to simplify equipment inventories by allowing one fixture type to adapt as productions, sets, and lighting requirements change. Rather than predicting tomorrow's fixture requirements by maintaining a predetermined mix of Profile and Wash fixtures, users can configure their inventory according to the production at hand.

Intelligent Lens Swap

Fuze Profile+ uses intelligent Lens Swap to transform from a fully-featured framing Profile into a true Fresnel Wash. More than simply exchanging one optic for another, the fixture automatically recognizes the installed lens and optimizes its internal optical system for the selected configuration.

In Profile mode, a 4°–54° zoom, full-blackout framing system, rotating and fixed gobos, bi-directional animation, iris, dual prisms, and dual variable frosts provide extensive creative options. With the Fresnel lens installed, Fuze Profile+ becomes a true Wash, with its integrated framing system providing precise barndoor-style beam control.

TruSpectrum

That adaptability extends to the light itself and its RGBMA light engine. TruSpectrum™—Elation's multicolor LED platform with integrated control over individual fixture performance and cross-fixture consistency—provides high-quality color and white light across a wide 2,400–8,500K CCT range.

FOR IMMEDIATE RELEASE

Looks can be fine-tuned with Green/Magenta adjustment, Dim-to-Warm, Virtual Gel Swatches and CMY emulation for natural, nuanced looks across theatrical, broadcast, and live-event applications. With CRI 92 and 12,740 lumens of output from its 500 W engine, Fuze Profile+ combines application flexibility with the performance required for demanding stage, studio and production environments.

TruSpectrum also places Fuze Profile+ within a wider Elation production toolbox. Across Fuze moving lights, KL static lighting and SÖL creative and effect fixtures, designers can work with a consistent philosophy of color, white light and overall quality of light while selecting the tool required for each application.

Built for Production Flexibility

The fixture also offers a high-speed electronic shutter and strobe and 16-bit dimming for added design flexibility. With a sub-30kg build and multiple fan modes for low noise performance, Fuze Profile+ transitions easily between touring, rental, and installed environments.

Designed for applications where powerful output, beam control, and color quality are essential, Fuze Profile+ continues the Fuze Series legacy with a new approach to fixture versatility. By consolidating two essential production roles into one platform while preserving creative freedom, Fuze Profile+ is a powerful fusion of performance, flexibility, and value.

About Elation

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and production/rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of dependable specialty effects called Magmatic. Elation serves clients worldwide through offices in Los Angeles, Mexico City, Canada, and the Netherlands. We invite you to take a closer look at elationlighting.com
