Elation Launches Lumina Matrix Warm-White LED Wash/Blinder

Elation Professional is pleased to announce the launch of the Lumina Matrix, a warm-white LED wash/blinder. Ideal for stage lighting applications where an even wash of warm light or pixel-controllable blinder is required, the Lumina Matrix mimics the warm look of tungsten halogen.

The Lumina Matrix is a 40 cm x 40 cm LED matrix panel that houses sixteen 7-watt warm-white LEDs (2700K) in a 4 x 4 array with individual control of each pixel and high CRI for more accurate color reproduction. A 15° beam produces a smooth wash or blinder effect and a perfectly aligned reflector gives the warm look of a halogen lamp.

The fixture allows for individual pixel control, which opens up for custom designs or users can turn to the convenience of built-in macros. Theatrical grade 0-100% electronic dimming with variable dimming curves allows for easy intensity adjustments and the Lumina Matrix operates flicker free for use in TV, film or any broadcast application. It is ideal for stage applications for even washes of warm white light or as a direct view blinder effect with matrix/pixel control. Its versatility covers live events, broadcast, theatre, and touring applications and draws a low 150W of total power.

The Lumina Matrix can be rigged side by side in a vertical or horizontal array and comes with multiple-unit power linking. A host of features come standard like DMX and RDM protocol, and the fixture has 5-pin XLR and powerCON in/out connections. Software updates can be made remotely through RDM and an auto-sensing power supply allows it to operate anywhere in the world.

The Lumina Matrix offers all the benefits of LED like greater reliability, less maintenance and increased energy efficiency for a lower cost of ownership and like all Elation fixtures it is covered by Elation's 2 Year Warranty and Total Support.

About Elation Professional

Elation Professional is one of the world's leading lighting and visual solutions providers and is the global brand of Elation Lighting. Founded in 1992 and headquartered in Los Angeles, with European sales, distribution and support based in The Netherlands, Elation designs and manufactures a comprehensive range of innovative yet affordable lighting and video products that are distributed through a global network of dealers and distributors. Made up of a spirited team of dedicated personnel, Elation is setting new efficiency and performance standards in Platinum lamp and LED technology and is acknowledged for a comprehensive commitment to Total Support. As a company in expansion with a presence in a growing variety of market segments, chances are you've experienced Elation lighting at a concert, special event, TV, theater, late night venue, House of Worship, theme park, cruise ship, exhibition, architectural space or elsewhere.
