Elation Unveils Magma Prime Tour: High-Performance Fazer for Stunning Atmospherics

From subtle ambience to striking beam definition, Elation proudly introduces the **Magma Prime Tour**, a powerful, high-performanceazer designed to shape atmosphere and bring aerial effects and dynamic lighting to life.

Engineered for professional touring, live productions, and permanent installations, the Magma Prime Tour utilizes a water-basedazer system to produce a high volume of continuous, ultra-fine haze. The result is a long-lasting diffused effect that hangs evenly in the air, ideal for atmospherics, gobo enhancement, and beam visibility.

Magma Prime Tour's powerful 1500W rating ensures ample output, while the 1350W heater enables rapid warm-up time, reaching full operational readiness in only 20 seconds. Capable of generating up to 20,000 cubic feet per minute (CFM) of dry haze, the unit fills even large venues while maintaining efficient power consumption. It is ideal for concerts, theatrical productions, broadcast studios, fixed installations, or anywhere consistent, even haze is essential.

To support extended operation, the Magma Prime Tour features a 1.48-gallon (5.6-liter) fluid reservoir and an efficient fluid consumption rate of approximately 0.338 oz (10 ml) per minute, an optimal balance of output and economy. Optimized for use with **Atmosity Extreme Filtered Fog Fluid**, the system ensures reliable, high-quality performance without residue buildup or clogging.

The unit is equipped with a DMX-Activated Sleep Mode, allowing users to reduce power consumption when theazer is not in use, and without unplugging the unit. This energy-saving feature not only conserves power but also extends the unit's lifespan, making it ideal for productions with intermittent haze needs.

Built for the rigors of professional environments, the Magma Prime Tour incorporates a thermally protected heat exchanger for safe, dependable operation. Its rugged road-case design, integrated handle, and compact footprint make it easy to transport and integrate into any setup.

FOR IMMEDIATE RELEASE

The Magma Prime Tour offers flexible control options and intuitive touch control operation. Users can expand wireless control capabilities with the optional Aria X2 Wireless DMX Module or select from a variety of remote-control options. Over-voltage protection on startup ensures reliable operation and safeguards the unit against electrical spikes.

Whether used for touring productions, theatrical stages, large-scale events, or permanent installations, the Magma Prime Tour delivers exceptional performance, reliability, and durability.

About Elation

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of dependable specialty effects called Magmatic. Elation serves clients worldwide through offices in Los Angeles, Mexico City, and the Netherlands. We invite you to take a closer look at elationlighting.com
