

FOR IMMEDIATE RELEASE

04-Aug-2022

Main Light adds more Elation gear to inventory in form of Fuze MAX Spot™

One of the largest dry-hire rental houses in the United States, Main Light, has added Elation Professional's new [Fuze MAX Spot™](#) LED moving head to its growing inventory of high-quality lighting products. The full-color-spectrum automated LED Spot fixture is currently in stock and available to [rent](#) across all Main Light locations.

“The Fuze MAX series of fixtures helps fill a gap that has existed in the LED engine fixture types,” stated Randy Mullican, CEO at Main Light. “The customer feedback has been extremely positive in the short time the fixtures have been on the market.” Dave Pretz, Main Light National Asset Manager, adds, “The high CRI on the Fuze MAX series makes it a great fixture for on-camera applications which need high quality lighting, and the price point provides a cost-effective option to add to our rental inventory.”

FOR IMMEDIATE RELEASE

First seen at the USITT show in March and shipping since April, the Fuze MAX Spot is a 21,000-lumen full-spectrum LED spot fixture with RGBMA engine (92 CRI) that rivals 1000W/1200W class discharge fixtures. Its wide chromatic range (including dynamic whites), 7° to 53° zoom, full feature set (three gobo wheels, animation wheel, dual frost, prism and iris) and outstanding quality make it ideal for a wide array of precision lighting applications. It is also available in a Profile framing version.

“The Fuze MAX series is the evolution of many years of innovation and development from our team,” states Eric Loader, Sales & Marketing Director at Elation. “We have taken all of our experience with full spectrum LED light sources and combined it with all the best features requested of high performance moving lights to create the perfect balance of performance and value in professional moving lights.”

The addition of the Fuze MAX Spot complements an inventory at Main Light that already includes a large quantity of other Elation Professional lighting. Check out the Fuze MAX Spot demo video [here](https://www.youtube.com/watch?v=8Qysd-2JV3Q). [<https://www.youtube.com/watch?v=8Qysd-2JV3Q>]
