Free NETRON CLU from Obsidian makes data management a breeze

Obsidian Control Systems is pleased to offer the NETRON CLU, an easy-to-navigate central utility interface useful in discovering and managing NETRON data distribution devices across a lighting network. Especially helpful when deploying networks that use multiple nodes, or when working with nodes that lack integrated screens, the NETRON CLU makes NETRON data signal devices even easier to configure, eliminating the need to physically access the devices themselves.

NETRON devices can be discovered regardless of their current IP address, and all NETRON features can be centrally configured, or reconfigured, without the need to access individual web pages or the device displays. Whether you're setting up a handful of nodes for a live event or 50 nodes for an install, remote access to all device functions straight from a computer makes device settings easy to overview and node deployment a breeze.

The Windows-based NETRON CLU app continuously monitors the network status and indicates the devices' online or offline status on the user interface. The NETRON CLU also includes integrated firmware update management, allowing users to upgrade multiple devices to the latest firmware release simultaneously and with a single click.

The NETRON CLU fully supports all NETRON devices and is free to use. Download the latest version [here](https://files.obsidiancontrol.com/s/NetronCLU). [https://files.obsidiancontrol.com/s/NetronCLU]

NETRON is Obsidian Control Systems' comprehensive range of DMX Splitters and Ethernet to DMX gateways, supporting applications from live production and venue installations to architectural environments. Featuring outstanding build quality, advanced feature sets and smart mounting options, they excel in the management of complex networked lighting systems. Developed with the user in mind, NETRON products combine tough hardware with smart software for fast setup and solid performance.

About Obsidian Control Systems

Obsidian Control Systems is an accessible line of advanced yet intuitive lighting control products for professionals. Refined by passion, Obsidian Control Systems combines over 30 years of experience developing professional entertainment lighting control solutions for automated and theatrical lighting fixtures. Obsidian lighting control software and hardware is easy to use and accessible to every level of user, whether a

novice programmer or a designer at the highest level. All Obsidian lighting control systems run innovative ONYX™ lighting control software, a powerful yet easy-to-learn lighting control platform designed for both hardware consoles and PC systems. Obsidian Control Systems also offers a complete line of NETRON™ data distribution products. Obsidian products are distributed exclusively by Elation worldwide and are available in various sizes to accommodate any scale and budget. Visit the Obsidian Control Systems website at www.obsidiancontrol.com to learn more.
