Obsidian Control Systems introduces flexible, compact NETRON EP2 EtherDMX node

Obsidian Control Systems announces the newest addition to its extremely successful and rapidly expanding NETRON range of innovative data distribution devices. The NETRON EP2™ is a no nonsense, no compromise Ethernet to DMX gateway solution for the professional lighting and AV markets. Part of the NETRON family of easy-to-use EtherDMX nodes, it offers a high-value solution for any type of system that requires rugged hardware, flexible configuration and a reliable Ethernet to DMX gateway solution at an affordable price.

Ideally suited for the installation of distributed DMX Universes in venues, the universal housing of the EP2 provides mounting in 2-Gang boxes (US) as well as European Standard 50mm round boxes in the same extremely compact design. The EP2 ships with a full metal back box and M10 and M12 truss mount bolt attachment points included, as well as a universal USB-C power supply.

The NETRON EP2™ offers two 5pin DMX/RDM optically isolated ports, each port bidirectional for DMX In and Output. Designed with ease of use in mind, it is simple to configure through either the 1.3" OLED display and encoder or the integrated web menu system. POE or USB-C powered, it includes factory and user presets for instant plug-and-play setups. It follows the same proven, user-friendly menu structure as existing NETRON nodes in the market. The NETRON EP2 also unlocks the ONYX Nova license, allowing up to four Universes of DMX output.

The EP2 is part of Obsidian Control Systems' flexible NETRON data distribution range that encompasses Ethernet to DMX gateway, DMX splitter and DMX/RDM splitter solutions. NETRON devices support Art-Net, sACN, DMX-512 and RDM protocols and are quickly gaining a reputation for reliable 24/7 operation.

About Obsidian Control Systems
Obsidian Control Systems is an accessible line of advanced yet intuitive lighting control products for professionals. Refined by passion, Obsidian Control Systems combines over 25 years of experience developing professional entertainment lighting control solutions for automated and theatrical lighting fixtures. Obsidian lighting control software and hardware is easy to use and accessible to every level of user, whether a novice programmer or a designer at the highest level. All Obsidian lighting control systems run innovative ONYX™ lighting control software, a powerful yet easy-to-learn lighting control platform designed for both hardware consoles and PC systems. Obsidian Control Systems products are distributed exclusively by Elation Professional worldwide and are available in various sizes to accommodate any scale and budget. Visit the Obsidian Control Systems website at www.obsidiancontrol.com to learn more.
