

## FOR IMMEDIATE RELEASE

12-Nov-2019

### Obsidian Control Systems to show NX 4™ with DYLOS™ at LDI 2019

Obsidian Control Systems is pleased to be showing the powerful **NX 4™** lighting controller with **DYLOS™** pixel composition engine at LDI 2019 in Las Vegas. Designers, programmers and operators are invited to **Booth #602** for a look at this powerful console in the intuitive **ONYX™** platform and experience the creative possibilities with **DYLOS**.

The NX 4 is the newest member of the innovative **ONYX™** lighting control platform. Equipped with a range of professional features and using the latest in industrial components, the NX 4 is designed to handle even the largest show with ease. With a well-arranged combination of motorized and manual faders, along with an array of playback buttons, the NX 4 offers 44 total playbacks in a compact yet extremely powerful package. Fast boot times, instant operation and the ability to process 64 Universes right inside the console without the need for costly external processing networks results in unprecedented power in this form factor.

The NX 4 includes a high-brightness, 15.6", full-HD multi-touch screen with support for two external 4K touch displays. Eight assignable parameter encoders, a dedicated Intensity encoder, an assistive mini-touch screen, full keypad and command section, and a dedicated grand master make for an intuitive control surface. Two independent playback sections offer instant access. The main playback with 10 motorized faders plus 10 play-pairs allow for quick page changes while the sub playback with 12 faders and 12 button playbacks means important cues are always at your fingertips.

#### **DYLOS™**

Obsidian Control Systems offers **DYLOS™** in each NX 4 console, a pixel composer that far exceeds the capabilities of regular pixel-mapping systems. It is the first of many exciting steps for the **ONYX™** platform to provide a comprehensive toolset of dynamic fixture animation, exciting content generators and powerful media playback, easily accessible through an elegant and well-thought-out user interface. Following the natural workflow of **ONYX**, the **DYLOS** pixel composer seamlessly integrates and is available at a moment's notice to enhance lighting designs. Based on a full 3D environment and powerful DirectX graphics processing, the **DYLOS** engine has been designed from the ground up for power and performance to manage thousands of fixtures and parameters with ease.

### **ONYX™**

The NX 4 runs innovative ONYX™ lighting control software. ONYX is a powerful yet easy-to-learn lighting control platform designed for both hardware consoles and PC systems. It is a rebranding of the well-established M-Series control platform and is designed for use with all new ONYX and existing M-Series hardware. Obsidian Control Systems products are distributed exclusively by Elation Professional worldwide and are available in various sizes to accommodate any scale and budget. More information on Obsidian Control Systems and the ONYX platform can be found at [www.obsidiancontrol.com](http://www.obsidiancontrol.com).

If you haven't yet registered for LDI 2019, make sure you do so at [www.compusystems.com/servlet/ar?evt\\_uid=343&oi=LkkjCVM7IHfHoliGjo9vog%3D%3D&company\\_code=EXINV63](http://www.compusystems.com/servlet/ar?evt_uid=343&oi=LkkjCVM7IHfHoliGjo9vog%3D%3D&company_code=EXINV63).
