09-Sept-2019

## Obsidian Control Systems to show powerful NX 4™ with DYLOS pixel composer at 2019 PLASA

Obsidian Control Systems is pleased to be joining with UK distribution partner Entedi September 15-17 at PLASA in West London where the new **NX 4™** lighting console with **DYLOS™** pixel composition engine will be available for demo. Designers, programmers and operators are invited to **Stand H40** for a look at this powerful console in the intuitive **ONYX™** platform and experience the creative possibilities with **DYLOS**.

### **NX 4™**

Equipped with a range of professional features and using the latest in industrial components, the NX 4 is designed to handle even the largest show with ease. With a well-arranged combination of motorized and manual faders, along with an array of playback buttons, the NX 4 offers 44 total playbacks in a compact yet extremely powerful package.

Fast boot times, instant operation and the ability to process 64 Universes right inside the console without the need for costly external processing networks results in unprecedented power in this form factor.

### **DYLOS™**

DYLOS aims to provide new and innovative ways that far exceed the capabilities of regular pixel-mapping systems and is the first of many exciting steps for the **ONYX™** platform to provide a comprehensive toolset of dynamic fixture animation, exciting content generators and powerful media playback. Based on a full 3D environment and powerful DirectX graphics processing, the DYLOS engine has been designed from the ground up for power and performance to manage thousands of fixtures and parameters with ease.

### **ONYX™**

ONYX is a powerful yet easy-to-learn lighting control platform designed for both hardware consoles and PC systems. It is a rebranding of the well-established M-Series control platform and is designed for use with all new ONYX and existing M-Series hardware. Obsidian Control Systems products are distributed exclusively by Elation Professional worldwide and are available in various sizes to accommodate any scale and budget. More information on Obsidian Control Systems and the ONYX platform can be found at [www.obsidiancontrol.com](http://www.obsidiancontrol.com).
