Obsidian Draws Large Turnout in India with Nationwide Training

Obsidian Control Systems recently delivered a 3-day training in India supported by VMT, the brand's official Indian distribution partner. Spearheaded by Obsidian's Business Development Director Koy Neminathan and Lighting Designer Giancarlo Vannetti, the training series attracted over 100 lighting professionals eager to get hands-on with the NX1, NX2, and NX4 consoles.

Designed to empower and elevate, the sessions offered deep insights into Obsidian's advanced architecture and functionality. "Watching participants gain confidence with the NX1, NX2, and NX4 through hands-on experience was truly rewarding. The passion for lighting control in India is inspiring, and we're excited to see how these professionals take their skills forward," noted Giancarlo Vannetti.

Neminathan echoed this sentiment: "It was incredible to see the enthusiasm and engagement from the attendees. Obsidian Control Systems is built to empower lighting professionals, and this training session truly showcased its capabilities in the hands of eager learners."

Obsidian lighting consoles are easy to use and accessible to every level of user, whether a novice programmer or a designer at the highest level. All Obsidian lighting control systems run innovative ONYX lighting control software, a powerful yet easy-to-learn platform for hardware consoles and PC systems.

Jeff Mandot, National Sales Manager at VMT, added, "Hosting this training session with Obsidian Control Systems was an incredible experience. With over 100 attendees, the

enthusiasm for learning was evident. We are proud to support the growth of lighting professionals in India."

About Obsidian Control Systems
Obsidian Control Systems is an accessible line of advanced yet intuitive lighting control products for professionals. Refined by passion, Obsidian Control Systems combines over 30 years of experience developing professional entertainment lighting control solutions for automated and theatrical lighting fixtures. Obsidian lighting control software and hardware are easy to use and accessible to every level of user, whether a novice programmer or a designer at the highest level.
