Obsidian Unveils NXW: The Compact Powerhouse for ONYX Control

Get ready to experience the next evolution in lighting control. At Prolight + Sound in Frankfurt (April 8–11), Obsidian Control Systems proudly previews the **NXW** – a sleek, portable, and fully featured PC control wing designed to bring professional-grade power to any ONYX setup. Visit us at **Stand B49/C49 in Hall 12.1** for an exclusive first look.

Through its USB-C connection, the NXW provides a responsive, professional hardware surface to operate ONYX on any PC system without compromises. Designed for freelancers, touring professionals, and fixed installs alike, the NXW delivers everything lighting operators love in a compact, road-ready form. From RGB-backlit motorized playback faders to RGB-backlit keycaps and customizable multi-function buttons, every detail is crafted to boost speed, precision, and creativity.

“The NXW might be small in size, but it’s packed with features our users have been asking for,” says Koy Neminathan, Business Development Director at Obsidian. “Whether you’re working live on stage or pre-programming at home, this little powerhouse delivers. It’s responsive, flexible, and ready for anything.”

NXW Key Features:

- 10 Motorized Faders with RGB Backlight
- Low Latency Optical Buttons with RGB Backlight
- Programming Keypad + 10 Multi-function Buttons
- 4 RGB Parameter Encoders
- 4 Integrated DMX/RDM Ports
- Gigabit Network Port
- 16-Universe ONYX Essential License (Upgradeable to 128 via USB License Port)

Built to match the layout and feel of larger NX consoles, any user of ONYX will feel instantly familiar with the NXW. The design is ergonomic and comfortable, making it a pleasure to use right out of the box. Plug it into your ONYX PC system and get started instantly—no setup or additional installation is required. No compromises, no delays. Just instant control.

Portable and lightweight, the NXW is expandable with the **NXP** motorized fader wing and is a perfect add-on to the **NX1** console. The expandable design offers flexibility and scalability, allowing users to adapt their setup to any size production or control environment with ease.

From the rugged hardware to the intuitive design, the NXW is engineered for professionals who need a reliable, high-performance control surface on the go. Whether you're lighting a live concert, a theater show, or a broadcast studio, the NXW adapts to your needs – and your budget.

See the NXW in action at Prolight + Sound and discover how big performance can come in a small package.

About Obsidian Control Systems

Obsidian Control Systems is an accessible line of advanced yet intuitive lighting control products for professionals. Refined by passion, Obsidian Control Systems combines over 30 years of experience developing professional entertainment lighting control solutions for automated and theatrical lighting fixtures. Obsidian lighting control software and hardware is easy to use and accessible to every level of user, whether a novice programmer or a designer at the highest level. All Obsidian lighting control systems run innovative ONYX™ lighting control software, a powerful yet easy-to-learn platform for hardware consoles and PC systems. Obsidian Control Systems also offers a complete line of NETRON™ data distribution products. Obsidian products are distributed exclusively by Elation worldwide and are available in various sizes to accommodate any scale and budget.
