Elation Adds Innovative World Premiere Product Launches to PLASA Line-up

Elation Professional has added two world premiere product launches to its list of innovative product offerings at the upcoming PLASA show in London. Showing at **Stand H40** for the first time anywhere, Elation will be debuting the **Artiste Dali™**, a full-featured moving head with state-of-the-art LED / Laser Phosphor light engine and the second luminaire in Elation's Artiste series. The second world premiere product is the new **Dartz 360™**, a unique, full color-mixing LED beam/spot fixture with gobos and effects that gives all new projection possibilities from a narrow-beam luminaire. Both luminaires have been nominated for a PLASA Award for Innovation.

Artiste Dali™: The new Artiste Dali™ is a full-featured moving head with innovative LED / Laser Phosphor light engine that gives greater spot and beam capabilities from one fixture. The unique hybrid light engine combines a 300-watt LED source and 100-watt Laser Phosphor source for improved spot/beam functionality. The Laser Phosphor source produces a denser beam with a level of brightness not possible with LED alone. By combining the two sources, users get a spot with extra punch (15,000 lumens) in an energy-efficient solution. Features include eFly wireless DMX, CMY+CTO variable color mixing, color wheel, rotating and static gobos, prisms, animation, zoom and frost. Combined with the powerful new LED/Laser Phosphor engine, the Artiste Dali provides the latest technology and professional performance to fit into a variety of applications and designs.

Dartz 360™: The new Dartz 360™ is a unique, full color-mixing LED beam/spot fixture with gobos and effects that gives all new projection possibilities from a narrow-beam luminaire. A single-source 50W RGB LED engine produces a powerful and tight 3-degree beam for smooth, color-mixed beam effects similar to a discharge lamp. Extremely bright for its wattage and size, a combined LED engine source/optics package provides better field and brighter output than previous multi-chip LED "beam" solutions. The Dartz 360 is also compact and phenomenally fast with continuous 360° pan and tilt movement added to the gobos, dual prisms, frost and remote focus.
