Elation Paladin™ Market's Most Versatile Blinder/Strobe/Wash Light

Elation Professional is pleased to offer the new IP65-rated Paladin™, a highly versatile hybrid LED luminaire that functions as a brilliantly bright blinder, powerful strobe and high-output wash light. Adding to its flexibility, this multi-functional light also houses a motorized zoom for full beam control and its IP65 rating means it can be used on all types of events without the need for weather protection.

Paladin is a new breed of hybrid. More than a powerful full-color strobe, Paladin also functions as a high-power wash light, blinder or eye candy effect in one brilliantly bright luminaire. Twenty-four 40W RGBW LEDs produce a blistering 990 watts of power for intense and colorful effects and RGBW color mixing gives a full spectrum of color options, including high-impact white light. A motorized zoom expands the beam from 9° to 25° with output at its narrowest angle measured at 43,240 lux @ 9.8' (3m).

For added visual dynamism, multiple pixel zone control can be incorporated for spectacular pixel mapped and eye candy looks. The Paladin includes extremely smooth 16-bit dimming with variable dimming curve modes available for faster programming. For added programming convenience, 64 color presets and 15 unique color macros are included.

The fixture's hybrid design and feature flexibility make it extremely useful for a wide variety of applications from concerts and events to clubs, theatres and more. LED refresh rate frequency and Gamma brightness are adjustable, making it ideal for broadcast applications as well. In fact, over 350 Paladin fixtures recently featured on the 2017 Eurovision Song Contest, seen by a television audience of over 200 million.

Paladin's rugged die-cast aluminum housing and IP65 design mean that the fixture can be used in even the harshest environments, and optional barn doors, egg crate and dual quick-lock omega bracket rigging accessories add to its possibilities.

Control of Paladin is possible via multiple DMX channel modes and the fixture is RDM equipped (Remote Device Management) for easier configuration and monitoring of DMX based systems. Paladin comes with IP-rated 5pin DMX In/Out and powerCON TRUE1 In/Out connections and includes a 4-button touch control panel and LCD menu display for easy hands-on addressing with easy-to-read fixture menus and messages. The fixture operates flicker free for use in TV and other broadcast applications and an auto-sensing power supply covers worldwide voltages and frequencies.
