

FOR IMMEDIATE RELEASE IMMEDIATE RELEASE

22-Sept-2021

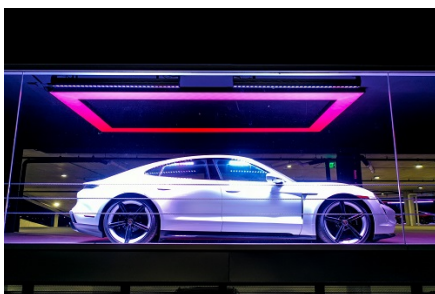

Top-tier branding with Elation SEVEN Battens™ at Porsche Dealership in Austin, TX

Intelligent Lighting Services designs and installs attention-getting lighting system for top floor window display

The name Porsche stands for the highest quality and Porsche Austin is delivering a dealership experience that lives up to the brand. One of the most impactful aspects of the dealership in Austin, Texas, is a top floor window display of ten Porsche cars wonderfully highlighted using [SEVEN Batten 72™](#) linear lights from Elation Professional.

Eric Bernstein of Intelligent Lighting Services (ILS) of Austin has worked with the dealership's ownership group for about 20 years. On this latest project, he worked with Kirk Franceschini, managing partner at Hi Tech Motorcars (Porsche Austin Group), who was tasked with implementing a lighting system that would attract attention to the new dealership. The idea was to line ten Porsche cars along a sixth floor display window and illuminate them in high-quality lighting so they couldn't be missed by the myriads of people who drive by the dealership each day.

Bernstein designed the sixth-floor look and specified 20 Elation SEVEN Batten 72 fixtures, 6-ft color-changing LED battens with 7-color multi-chip LEDs, two units illuminating each car. "We brought several fixtures up there to demo in order to give the client a few choices," said Bernstein, who was already familiar with the SEVEN Batten from several church installations he has used them on. "We decided that the SEVEN Batten was best for both color choices and power. It also has an integrated gel slot so it's easy to put filters in."

FOR IMMEDIATE RELEASE

Elation's SEVEN Batten houses long-life 25W RGBAW + Lime + UV LEDs, which provide an expanded palette of colors including a better white mixed output and improved CRI across all mixed white color temperatures. Add to that an advanced optical design that produces better color mixing and smoothness of field and the SEVEN Batten series is capable of powerful projections of uniform color onto any surface.

At Porsche Austin, the SEVEN Battens work with light halos above each car, each halo comprising 496 4-color LEDs with the intention of having full control over them. Each halo runs four universes via a [Netron EN4™](#) from Obsidian Control Systems, a powerful Ethernet to DMX gateway with internal cues, as well as factory and user presets.

As one of the largest Porsche dealerships in the US, and an apex brand in the automotive industry, Porsche is naturally strict when it comes to branding. Lighting plays a key role in the presentation of a vehicle and just like at an auto show, high lumen output and an extremely uniform level of light is required. "The SEVEN Battens usually run in white light and for the grand opening in August we popped everything in really bright white and it looked great," Bernstein said of the window display illumination.

The Porsche Austin dealership is naturally supportive of the local community and according to Bernstein that's where color comes into play. "They will use the colors for branding local events to tie the dealership in with support for local teams," he says. "Our new MLS team, Austin FC, plays at Q2 Stadium and you can see the dealership from the stadium so the top display floor will light up in the club colors of green and white." The dealership will also glow in burnt orange to support University of Texas games.

Although the grand opening of the new Porsche Austin dealership took place in August, ILS installed the SEVEN Batten fixtures in February as the new location has been operating since March. "Overall,

I've been very happy with the gear," Bernstein concludes. "I like the support I get from Elation and that's always been the case."

About Elation Professional

Based in California with facilities in Florida and Mexico City, as well as European offices in The Netherlands, Elation designs and manufactures a comprehensive range of innovative lighting products known for its superior performance, excellent efficiency, and outstanding price: value ratio, all backed by a hard-earned reputation for Total Support. Elation also offers an advanced line of lighting control products through Obsidian Control Systems, as well as a full range of dependable specialty effects called Magmatic. Our mission has always been simple: to provide best-in-class products and service while offering the best value: performance ratio in the industry. Elation products continue to be a part of the industry's most exciting projects across the globe. We invite you to take a closer look at www.elationlighting.com
