

FOR IMMEDIATE RELEASE

18-June-2019

Elation Proteus RAYZOR 760™ with SparkLED™ Now Shipping

Designers are often looking for something fresh and novel that can help them create a more unique show and that's exactly what Elation's RAYZOR 760™ with SparkLED technology delivers. Now the compact wash and specialty effect light is available in a weather and dust protected IP65 version – the Proteus RAYZOR 760™ – for use in any environment and under adverse conditions.

Offering the identical feature set and powerful output as the RAYZOR 760, the Proteus RAYZOR 760 is a highly effective LED wash light and unique specialty effect light in one. Driven by seven, independently controlled, 60W RGBW LEDs and housing a wide 5 to 77 degree zoom, the Proteus RAYZOR 760 can produce an intense and well-defined mid-air beam of over 8000 lumens and then spread exceptionally wide for even wash coverage.

SparkLED™

The fixture's seven oversized front lenses create a large surface that is enhanced by SparkLED™ technology, 28x 2W white LEDs strategically placed inside the lenses themselves to create a unique additional layer of effect. The dedicated high-brightness pixels give designers all new possibilities to create layers of effect through elegant lens illumination and eye-candy twinkle effects.

The enhancing sparkle effect can also work as a stand-alone effect in its own right, giving designers the opportunity to fill idle space with something more inspiring. The new effect concept is unique to the RAYZOR 760 and Proteus RAYZOR 760 and allows designers access to a fresh, fun and innovative way of creating interest and depth on stage. SparkLEDs are controllable via the lighting console or driven by a multitude of internal FX patterns.

Continuous pan & tilt

In addition to its powerful wash, mid-air and enhanced effects, the Proteus RAYZOR 760 offers precise continuous pan & tilt rotation, allowing variable speed from slow to extremely fast movement effects. In fact, the Proteus RAYZOR 760 is the world's first IP65-rated LED wash effects luminaire with continuous pan & tilt rotation.

Combining its powerful output with SparkLED while utilizing the 360° movement opens up for a multitude of design possibilities from wide stage washes or mid-air beams to more subtle effects for mood generation, both off and on camera, indoors or out.

Housing professional control and connection features, the Proteus RAYZOR 760 not only takes stage, production and club designs to a new cutting edge, it does it discreetly as it weighs in at only 28.6 lbs. (13kg) and measures a tidy (LxWxH) 14.5 x 11.6 x 17.4 in (367 x 295 x 442mm).
