Elation Protron 3K Color™ LED Strobe Offers an Explosion of Color

Elation Professional has added to its family of LED strobes with the new Protron 3K Color™, a high-power LED strobe light featuring 240 x CREE™ XLamp™ 3W RGBW LEDs and 40,000 lumens of power for an explosion of color. The Protron 3K Color not only packs a powerful punch of colored light - and without thermal issues - it provides a much better ROI compared to conventional 3K Xenon strobes on the market.

Utilizing special optics and new LED driver technology, the Protron 3K Color includes built-in strobe effect macros like burst, pulse and lightning for unique effects possibilities and can even operate FULL ON without causing thermal-out issues (output at full max 10 seconds) thanks to regulated silent cooling fans that keep the strobe from overheating.

The Protron 3K Color uses much less power than Xenon strobes (peak power output is 800W) and is energy efficient with high or low power mode options. Its energy-efficient design and affordable price tag make it an attractive choice for all types of applications from stage and studio to nightclubs and more.

Wrapped in a robust housing, the Protron 3K Color includes electronic dimming for full output control. Other benefits include a long average LED life of 50,000 hours, greater reliability and less maintenance compared to traditional Xenon strobes.

The Protron 3K Color is controllable via 4 DMX modes (3 / 5 / 7 / 8 channels) for a variety of control options. A host of features come standard like 3 and 5-pin DMX In/Out and new True One PowerCON In/Out connections with included PowerCON cable. A 4-button control panel with OLED menu display makes for easy navigation through DMX and manual settings and an auto-sensing power supply allows the Protron 3K Color to operate anywhere in the world.

About Elation Professional

Elation Professional is one of the world's leading lighting and visual solutions providers and is the global brand of Elation Lighting.
