

FOR IMMEDIATE RELEASE

04-Dec-2025

Elation Unleashes REBEL WASH: Power and Color with Attitude!

Elation proudly expands its bold new breed of intelligent lighting with the launch of the [REBEL WASH 4](#) and [REBEL WASH 12](#), two high-powered wash moving head luminaires in the growing REBEL Series. After inviting lighting professionals to break the rules with the REBEL PROFILE, Elation now brings that same rebellious spirit to wash lighting, offering powerful color, precision, and creativity without stretching the budget.

Designed for a new generation of lighting designers who demand more from their tools, the REBEL WASH fixtures deliver exceptional color, impressive output, and striking visual effects for everything from broad, even washes to crisp mid-air beams. With a rugged build, IP65 protection, and intelligent feature set, they're engineered to perform reliably in any environment.

Brilliant Color, Exceptional Quality

A cutting-edge zoom-lens optical system ensures a highly homogenized beam with smooth, consistent color and light distribution. At the heart of REBEL WASH is an RGBL LED engine engineered for vivid primary colors and outstanding white-light performance with high CRI and calibrated color temperature control.

FOR IMMEDIATE RELEASE

The addition of a Lime emitter expands the color spectrum, enhances white light quality, and boosts overall output. Designers gain access to intense saturated looks, beautifully balanced whites, and a virtual gel library of calibrated color presets that replicates the look of popular filters.

A dedicated variable CCT control channel (2400K - 8500K) gives precise color temperature control, while CMY emulation mode caters to those familiar with classic CMY mixing.

High Output, High Performance

Whether choosing the compact REBEL WASH 4 or the more powerful REBEL WASH 12, users can expect impressive brightness and color consistency:

- REBEL WASH 12: 12×60W RGBL LEDs delivering 14,000 lumens
- REBEL WASH 4: 4×60W RGBL LEDs delivering 4,000 lumens

Advanced LED power management drives maximum punch from the high-wattage emitters, channeling power to active colors for an exceptionally punchy color mix.

A wide 5°–40° motorized zoom shifts effortlessly from tight, defined aerial beams to smooth, uniform washes.

Creative Freedom Built In

Multiple pixel-control modes—along with simple uniform options—let designers create everything from subtle gradients to bold, high-energy effects. A 360° continuous pan and tilt, smooth 16-bit dimming, and a fast electronic shutter/strobe give designers the additional tools they need to push their creativity further.

Engineered for the Real World

The REBEL WASH is built to withstand the toughest conditions. With an IP65 rating, both models are fully protected against dust and water, making them ideal for outdoor events, festivals, theme parks, or any demanding indoor setting. The rugged construction ensures long-term durability with minimal maintenance.

Power, Durability, and Value

REBEL isn't just about technology—it's about attitude. Compact yet powerful, advanced yet accessible, the REBEL WASH challenges expectations of what a workhorse luminaire can be. It delivers premium performance, rugged durability, and real value, empowering designers to stand apart and design boldly.

About Elation

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of
