## Elation Launches Hard-hitting Rebel Dartz

Elation is proud to announce the launch of the [Rebel Dartz](#), a compact, high-energy beam FX moving head that channels the unapologetic Rebel spirit into a highly versatile, creative tool for designers who prioritize hard-hitting visuals.

An evolution of Elation's popular Dartz 360, the Rebel Dartz delivers four times the brightness of the original, enhanced optics, an expanded FX toolkit, and full IP65 all-weather protection. It is now shipping and available across Elation's global partner network.

### Defining Beams

With an ultra-narrow 1.5° beam, the Rebel Dartz carves through the air with intensity, delivering an impressive 125,475 lux at 5 meters. Whether slicing through atmospherics or creating tightly focused aerials, its dense, piercing beam serves as a defining feature of any design.

Built for concerts, festivals, DJ and EDM productions, corporate and special events, and any application where visual impact, energy, and atmosphere matter, the Rebel Dartz cuts through and gets noticed.

### Color Punch

At the heart of the fixture is a 150W RBL LED engine producing rich, saturated colors with exceptional punch. A dedicated True Green filter enhances green output for richer tones.

Designers can fine-tune color temperature from 3200K to 16,000K to better match LED walls, optimize white balance, and keep aerials looking clean, crisp, and cutting. A virtual gel library offers an extended palette of color options.

### Expanded Creative Arsenal

The Rebel Dartz equips designers with a robust effects package in a deceptively small footprint:

- Dual gobo wheels (10 interchangeable rotating/indexing and 16 static stamped)
- Stackable prisms (6-facet linear and 8-facet circular)
- Heavy frost for beam shaping and wash expansion
- Smooth 16-bit dimming curves
- Variable strobe for added impact

FOR IMMEDIATE RELEASE

Together, these advanced features combine to deliver exceptional design versatility. Add in high-speed 360° continuous pan and tilt for full-throttle motion, and the Rebel Dartz unleashes an intense level of energy to any size show.

### **Built to Thrive, Flexible Control**

Engineered for durability, the Rebel Dartz features full IP65 protection, so it handles dust, dirt, and moisture with ease. It rigs fast and travels light with a compact, rugged design that is all about long-term reliability and low maintenance.

Comprehensive connectivity ensures easy integration into any control environment, with support for DMX, Art-Net, sACN, and RDM, plus NFC configuration and Aria X2 wireless DMX for fast setup and reliable wireless operation.

### **Unmistakably Rebel**

Built to inject every moment with the unmistakable Rebel spirit, the Rebel Dartz hits harder, moves faster, and raises the bar for compact beam fixtures. Designed for rental houses that deliver premium gear at unbeatable value, and lighting designers who blaze their own path, Rebel brings long-lasting value without the premium price—redefining what professionals should expect from their lighting.

The Rebel Dartz is now available through Elation's global network of authorized dealers and distributors.

### **About Elation**

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of dependable specialty effects called Magmatic. Elation serves clients worldwide through offices in Los Angeles, Mexico City, and the Netherlands. We invite you to take a closer look at [elationlighting.com](http://elationlighting.com)
