

FOR IMMEDIATE RELEASE

28-May-2026

Elation's Rebel Family Expands with Rebel Line of Creative Linear Tilt Bars

Dynamic RGBL + SparkX LEDs, fluid movement, beam continuity, and rugged IP55 design unlock new levels of creativity.

Elation is proud to introduce the Rebel Line Series, an exciting expansion of the [Rebel](#) family designed to unlock new levels of creative flexibility in linear lighting. Designed for bold visual impact and no-hassle integration, Rebel Line linear tilt bars deliver powerful output, precision optics, and advanced pixel artistry in a compact, stage-ready IP55 package.

The series includes two models:

[Rebel Line 8](#) – An 8-cell (1/2-meter) linear fixture with 11,548 lumens of output.

[Rebel Line 16](#) – A 16-cell (1-meter) linear fixture delivering 25,000+ lumens, designed for larger-scale impact.

Each fixture is driven by high-output 60W RGBL LEDs, producing intense, full-spectrum, fully tunable light that integrates seamlessly with Elation [Rebel Wash](#) and [Limelight](#) fixtures. Complementing the RGBL system, 5W CW SparkX LEDs generate striking cool-white crisscross aerial effects over any RGBL background, unlocking a new layer of creative possibilities.

Individual control of both the RGBL and SparkX pixels allows designers to easily adapt visual effects, from subtle fades and color shifts to complex pixel-mapped patterns.

Continuous Beams. Kinetic Motion. Limitless Design.

FOR IMMEDIATE RELEASE

A continuous, uninterrupted linear lens system ensures smooth, unbroken beams with no visible separations. Combined with a rapid 4°–35° zoom range and fast 210° tilt movement, the fixtures transform effortlessly from razor-sharp aerial beams that cut through atmospheric to immersive washes that fill a stage with rich color. An adjustable LED refresh rate up to 25 kHz guarantees smooth, high-speed imaging for demanding camera applications.

A mechanical alignment system allows Rebel Line fixtures to connect with ease, forming continuous beam lines and cohesive pixel arrays that read as a single, unified visual element across any stage or set piece.

Built for the Road — Indoors or Out

Engineered with IP55-rated dust and water protection, the Rebel Line thrives in demanding indoor and outdoor environments. Its rugged yet compact design makes it ideal for touring, festivals, broadcast environments, and permanent installations requiring bold intensity and adaptive color.

Included accessories such as a front louver/grid provide greater beam control, while a diffusion filter offers flexibility for softer wash applications when needed.

Precision Control for Modern Productions

The Rebel Line offers a host of other creative control tools. Users can easily adjust the color temperature between 2400K and 8500K for precise tuning, while a virtual gel library offers even more color options. Smooth 16-bit dimming curves and a high-speed electronic dimmer and strobe provide further nuance and impact.

Comprehensive connectivity ensures easy integration into any control environment, with support for DMX, Art-Net, sACN, and RDM, plus NFC configuration and Aria X2 wireless DMX for fast setup and reliable wireless operation.

Leave Your Mark

Each Rebel Line fixture features a customizable logo plate, allowing rental and production companies to brand fixtures with their own identity, ensuring their name shines alongside every moment.

With its powerful RGBL engine and SparkX effects, beam continuity, kinetic movement, and exact alignment system, the REBEL LINE Series introduces a sophisticated, creative dimension to dynamic linear lighting. The fixtures are available now through Elation's global partner network.

About Elation

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and production/rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of
