## Elation Reimagines Blinder Potential with New SÖL II and SÖL IV

Blinders have long needed a creative overhaul, and Elation has delivered with two groundbreaking additions to the SÖL BLINDER series: the SÖL II and SÖL IV. Equipped with the same RGBLAW LED engine and accepting the same front lens accessories as the popular SÖL I BLINDER, these new models have exponentially expanded the common blinder's creative potential!

With ultra-bright 2- and 4-cell configurations, the SÖL II and SÖL IV represent the next evolution in the SÖL series, offering enhanced power, flexibility, and durability.

### Unmatched Power and Flexibility

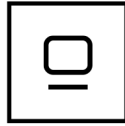

Featuring RGB+Lime+Amber+White LED engines with 93+ CRI and an IP65 rating, both fixtures deliver stunning brightness and precise color accuracy. The SÖL II's two 350W LED engines radiate a combined 30,750 lumens of output, while the SÖL IV takes it up a notch with four 350W engines delivering 59,830 lumens. Whether used as standalone units or integrated into larger lighting designs, both fixtures provide an exceptional canvas for creativity, making them ideal for any lighting setup.

### SÖL II: Double the Impact, Infinite Configurations

The SÖL II BLINDER doubles the creative punch with two fixtures in one modular unit, offering even greater flexibility for creative configurations and designs. Maintaining all the innovative features of the SÖL I BLINDER, its housing allows seamless connection on all sides, making it easier than ever to build expansive lighting arrays, custom shapes, and versatile effects panels that genuinely stand out.

### SÖL IV: Expansive Designs, Maximum Impact

The SÖL IV BLINDER, with its grid of four fixtures, pushes the creative boundaries even further. Like the SÖL I and SÖL II, the SÖL IV offers the same cutting-edge technology and powerful LED engine but with even more significant creative potential through its multi-fixture design. It

## FOR IMMEDIATE RELEASE

can be interconnected in endless configurations with additional SÖL IV units, as well as the SÖL I and SÖL II models, giving designers the freedom to craft expansive arrays, intricate shapes, and dynamic effects that adapt to any stage or event setup.

### **Precision and Versatility**

Both models come equipped with fully variable 16-bit color temperature adjustment (1800K - 8500K) for ultimate precision, along with dim-to-warm and redshift emulation for that classic incandescent glow. With CMY emulation and a virtual gel library, accessing vibrant LED colors and pre-mixed shades is a breeze, while advanced dimming curves and strobe effects further enhance creative control.

### **Boundless Creative Options**

Optional lens accessories, including a Bowens mount adapter, allow for even more aesthetic options and creative impact. Add to that a variety of mounting options and designers are empowered with the flexibility to craft unique visual experiences tailored to each performance. The fixtures' modern aesthetic and IP65 rating ensure they integrate seamlessly into any indoor or outdoor environment.

With the SÖL II and SÖL IV, Elation has redefined what blinders can do, delivering cutting-edge technology that puts creativity and flexibility front and center.

### **About Elation**

At Elation, we represent the elite in the lighting industry. We design and manufacture a comprehensive range of best-in-class entertainment lighting products valued by production/rental houses and lighting designers worldwide. Our dedication to extraordinary quality and creative solutions has established us as the go-to choice for professionals. With a storied legacy of brilliance, our influence extends from iconic stages to cutting-edge studios across the globe. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of dependable specialty effects called Magmatic. We invite you to take a closer look at [www.elationlighting.com](http://www.elationlighting.com)
