Slovenia's National Broadcaster Upgrades Studio with Elation KL Series Lighting

Slovenia's national television broadcaster recently completed a major studio lighting upgrade, installing Elation [KL Series](#) fixtures in its newly redesigned Studio 3 in Ljubljana. The project marks a milestone for Elation's presence in the Slovenian broadcast market.

The installation, delivered by Elation's local distribution partner Sync AV earlier in the year and integrated by KSL Sound and Light Studio, includes 24 [KL PANEL](#) LED softlights and 29 pole-operated [KL FRESNEL 6 CW PO](#) LED wash lights.

KL Series

Used by broadcast professionals worldwide for years, the KL Series encompasses a broad lineup of studio-quality lighting solutions that combine advanced LED technology with elegant design. To ensure the best possible match for the broadcaster's needs, Sync AV presented the Elation products in live demos and competitive shootouts, testing them directly in the studio environment.

As the country's national television station, they consistently seek out the latest technology from the world's top brands, prioritizing only the highest quality solutions. Seeking a superior key and fill light source, the broadcaster evaluated multiple lighting options from top-tier brands, measuring performance, light quality, and operational features.

Sync AV and KSL Studio

Sync provided Elation units for extended on-site testing, allowing the broadcaster to experience their output, versatility, and build firsthand. This rigorous process resulted in the selection of the

award-winning KL Series, which strikes the ideal balance between premium quality and competitive pricing. All softlights in the refurbished Studio 3 are now Elation.

“Our goal was to find a top-caliber solution that offered reliability and value,” said Boštjan Konič, CEO of KSL Studio, a Ljubljana-based provider of top-rate sound, lighting and multimedia systems. “The Elation KL Series not only met but exceeded our expectations, providing outstanding light output and color quality with real operational flexibility.”

KL PANEL: Premium Softlight for Broadcast

Designed for light-critical and noise-sensitive environments, such as on-camera productions, the KL PANEL is a full-color-spectrum LED softlight optimized for film and television. Featuring a 6-in-1 RGBWLC (Red, Green, Blue, White, Lime, Cyan) LED array, it delivers up to 24,000 field lumens, a high CRI of 95, and variable color temperature from 2000–10,000K.

For the Slovenian broadcaster’s news programming, the panels are mounted on a pole operation bracket and are primarily used as 5600K softlights, delivering natural, high-quality white light while offering the flexibility of full-spectrum color when needed.

KL FRESNEL 6 CW PO

The KL Fresnel 6 CW PO features a 150W 5600K cool white LED engine with a CRI above 97, producing over 8,500 lumens. Features include a 16° to 39° wide manual zoom, dimmer rotary dial, smooth 16-bit selectable dimming modes and curves, LED refresh rate frequency adjustment, and removable barn doors. Its pole-operated design allows easy pan, tilt, and zoom adjustments from the floor, enhancing efficiency and safety in a busy broadcast environment.

Sync AV has worked with Slovenia’s national broadcaster for over two decades and oversaw all production for the project. “Elation’s KL Series stood out in both performance and price-to-value ratio,” said Sync AV’s Anis Souissi. “The broadcaster was looking for top-tier quality and precise light control, and the KL range delivered.”

Also for National Broadcaster’s Maribor Facility

FOR IMMEDIATE RELEASE

The success of the Studio 3 installation has resulted in the installation of 50 KL FRESNEL 6 CW PO and 12 KL PANELs in the broadcaster's Maribor facility in Slovenia's second-largest city. With the Studio 3 upgrade successfully completed and the Maribor installation underway, these projects highlight the broadcaster's commitment to cutting-edge technology, help establish a new standard for studio production in Slovenia, and continue to reinforce the KL Series' reputation as a trusted solution for high-quality, versatile broadcast lighting.

About Elation

At Elation, we collaborate with leading professionals in the lighting industry to help bring extraordinary experiences to life. As a designer and manufacturer of a wide range of high-performance entertainment lighting products, we're proud to be a trusted partner to top lighting professionals and rental houses around the world. Our commitment to quality, innovation, and creative solutions has made us a go-to resource in the industry. We also offer an advanced line of lighting control products through Obsidian Control Systems, and a full range of dependable specialty effects called Magmatic.
