Elation SixPar Series Colors Unique StreetDome Skate Park in Denmark

Elation Professional's new SixPar Series of indoor and outdoor PAR color changers is providing dynamic color wash for skate boarders and other street sport enthusiasts at StreetDome, a one-of-a-kind modern skate park in Haderslev, Denmark.

Designed by CEBRA Architects, StreetDome is an open playground and the biggest skating facility in northern Europe with both indoor and outdoor areas for skateboarding, BMX, bouldering, street ball, parkour, rollerblading, street dance, and more. Serving as a social meeting place for kids of all ages, skill levels and cultures, if street sports are your bag then this is the place for you.

Central to the StreetDome complex, primarily indoor activities like skateboarding, basketball and bouldering, is the 1,500 sq. meter StreetDome Igloo. Unheated and lit primarily through sunlight during daylight hours, the dome-shaped roof hovers over a large open floor divided between a flat zone and a bowl zone, a series of skater 'pools' scooped out of the concrete floor.

Look up and the roof is divided into twelve equal triangular sections, eleven of the sections with an Elation SixPar 300 Par color changer mounted at its apex. Sold and installed by Elation partner Unico Gruppen (www.unico-gruppen.dk), each SixPar color changer houses 18x 12-watt 6-color LED multi-chips for plenty of brightness and an expanded palette of colors.

"The client wanted to color the ceiling in light but wanted a low power solution as well so we recommended the SixPar," stated Michael Henriksen of Unico Gruppen. "We placed one fixture to color wash each section of the ceiling for a nice uniform look. They can color the whole ceiling one color or shade each section a different color. The light also reflects down onto the sport areas below. The result is really nice. Besides the low power consumption, reliability and long LED life was also important for the client as the fixtures are hard to access and shouldn't require much service or bulb changes."

FOR IMMEDIATE RELEASE

With a long LED life rating of 100,000 hours, service intervals are few and far between. The SixPar 300 is just one luminaire in the SixPar Series however. Also available in indoor and outdoor versions is the SixPar 100 with 7x 12-watt LEDs and SixPar 200 with 12x 12-watt LEDs, as well as an outdoor version of the SixPar 300.

Although all SixPar Series color changers offer the possibility to strobe and include a selection of dimming curves, as well as color and chase macros, for safety reasons StreetDome only uses the effects during special events as flashing lights or quick color changes could disturb the skaters.

The SixPar's large variety of color choices are incorporated into the daily lighting scheme however, often accompanying music, or can be customized for special occasions such as Halloween when the ceiling was bathed in holiday shades. Onlookers outside the StreetDome Igloo also get a taste of the indoor dynamic as the venue's windows allow color schemes to be seen from outdoors for a tasteful architectural lighting look. The StreetDome SixPar lighting is controlled via a PC-based controller.

StreetDome opened in September with a Grand Opening weekend of events held in October, which Unico also supplied lighting for.

About Elation Professional

Elation Professional is one of the world's leading lighting and visual solutions providers and is the global brand of Elation Lighting. Founded in 1992 and headquartered in Los Angeles, with European sales, distribution and support based in The Netherlands, Elation designs and manufactures a comprehensive range of innovative yet affordable lighting and video products that are distributed through a global network of dealers and distributors. Made up of a spirited team of dedicated personnel, Elation is setting new efficiency and performance standards in Platinum lamp and LED technology and is acknowledged for a comprehensive commitment to Total Support.
