Elation Launches Theatre-style TVL CYC RGBW™ Cyclorama Wall Wash

Elation Professional is proud to offer the new TVL CYC RGBW™, a theatre-style cyclorama wall wash luminaire that delivers a smooth and even field of seamlessly blended colors onto cycloramas, backcloths, scenery or any surface.

An ideal color-changing floodlight for TV, film, theatre and broadcast applications, the TVL CYC RGBW features a powerful 150W RGBW LED engine for floods of uniform light in virtually any color while linear variable white color temperature presets (7200K - 3200K) make it a convenient white light luminaire.

Light output is measured at 884 LUX @ 6.6' yet the luminaire consumes only 170W of max power. Featuring smooth color mixing and 16 bit dimming, the TVL CYC RGBW's Chip on Board (COB) LEDs provide not only a greater output than surface mounted LEDs, they provide a more even light distribution with better color homogenization.

A 90° x 113° elliptical beam angle gives a broad, asymmetrical wash of light while 8-leaf adjustable barn doors (included) allow for customized shaping of the beam for more precise illumination and less light spill. The fixture comes outfitted with 64 internal color macros and strobe effects and selectable dimming curve effects add to its design possibilities.

Easy to control and mount, the TVL CYC RGBW is a versatile yet energy-efficient color changer that won't bust the budget. It is controllable via 6 DMX modes (4 / 6 / 7 / 8 / 10 / 14 channels) and multiple unit power linking makes for an easier, cleaner and more efficient setup. The unit comes with a host of standard features including 5-pin DMX In/Out connections and powerCON In/Out connections. A 4-button touch control panel with an intuitive, full-color, 180° reversible menu display makes for easy navigation through DMX and manual settings and an auto-sensing power supply covers worldwide voltages and frequencies.

Compact and weighing only 13.0 lbs. (5.9 kg), the TVL CYC RGBW operates flicker free for use in broadcast applications and a long LED life rating means service intervals are few and far between. The fixture naturally offers all the benefits of LED like greater reliability, less maintenance and increased energy efficiency.
