

FOR IMMEDIATE RELEASE

02-May-2022

## Magmatic offers touring tough Therma Tour™ haze effect generators

Magmatic atmospheric effects is pleased to offer Therma Tour, a series of oil-based hazers designed to give enduring haze effects for longer-lasting atmospherics. Capable of creating a fine particulate that hangs in the air for hours, each haze generator in the Therma Tour line excels at enhancing light beams and mid-air effects for higher impact, eye-catching visuals.

Magmatic is pleased to offer the Therma Tour, a premium oil-based haze effect generator that produces an exceptionally fine, long-lasting atmospheric haze. Available in a 350W and powerful 800W version – [Therma Tour 600™](#) and [Therma Tour 800™](#) – both machines create a safe, clean and odorless haze effect that leaves no residue.

Ideal at creating the perfect small-particle haze for highlighting light beams, the units hold 2.5 liters of fluid for over 35 hours of run time with no warm up time required. Hang time is incredibly long at over 3 hours in an enclosed space after the unit has been turned off!

Both units feature rugged, compact and mobile road case designs to withstand repeated travel and the day in and day out rigors of on-the-road use. Soundproof insulation means the Therma Tour series can also be used in more noise sensitive indoor environments.

Maximum output of the Therma Tour 600 is 1,200 CFM (cu ft/min) while the Therma Tour 800 delivers a remarkable 5,600 CFM (cu ft /min). Magmatic's oil-based Atmosity ARH fluid has been designed specifically for the Therma Tour series and because the units sip fluid at a low 1.0 ml/min and 1.5 ml/min respectively (fluid level can easily be monitored via an external

fluid level gauge), its fine haze atmosphere can enhance lighting effects for hours on end. And it does it while staying surprisingly quiet.

Advanced HPA (High Pressure Air) pump technology reduces the risk of heater clogging for performance that delivers on time, every time, while automatic self-cleaning and energy-saving mode make operation even more effortless and economical.

Therma Tour machines are hard to break but easy to use with multiple control options that include a wireless RF remote, Elation E-Fly wireless DMX, wired remote, Magmatic App, and manual touch-screen control.

### **Magmatic**

Designed, engineered and exclusively distributed by Elation Professional, Magmatic specialty effects are strong solutions that are on-the-road tough and made to endure. Products encompass a comprehensive range of haze and fog machines with the Magma™ and Thematic™ series, atmospheric snow machines with the Polar™ series, and CO2 cryogenic simulation effects with the Rocket™ series. Also available is an IP65-rated series of UV LED lighting products in the Prisma™ series. To complement all of the special effects machines, Elation has developed a complete line of specially formulated effect fluids called Atmosity™.

### **About Elation Professional**

Based in California with facilities in Florida and Mexico City, as well as European offices in The Netherlands, Elation designs and manufactures a comprehensive range of innovative lighting and video products known for its superior performance, excellent efficiency, and outstanding price:value ratio, all backed by a hard-earned reputation for Total Support. Through nearly three decades of intelligent lighting development, our mission has always been simple: to provide best-in-class products and service while offering the best value:performance ratio in the industry, helping show designers and producers achieve their vision. From discharge to LED, intelligent to conventional, Elation products continue to be a part of the industry's most exciting projects across the globe and our list of references is always growing.
