Elation Professional's Volt Q3 and Q5 – Versatile Dynamic Uplights

The Volt Q3 and Volt Q5 are versatile RGBW LED wash lights that run on a rechargeable lithium-ion battery so they can easily be placed wherever dynamic uplighting is needed. Their go-anywhere portability, combined with an all-weather IP-65 housing, means the Volt Q3 and Q5 can be used for a large variety of indoor or outdoor applications.

With no power cords required, and equipped with a wireless DMX receiver that frees them from the constraints of DMX cables (compatible with Elation's EWDMX or W-DMX), the Volt Q3 and Q5 provide a fast, easy and effective decorative lighting solution. Their built-in battery will last up to 8-12 hours between charges. Ideal for on-the-go productions of all types, and compact at only 11 inches high (approx. 280mm), these versatile wash lights are also impressively bright while providing a green lighting design solution.

Three (Volt Q3) and five (Volt Q5) 100,000-hour, 15-watt, quad-color LEDs provide full color mixing capability. Field angle range is 7-13° and snap-on diffusion filters allow the user to soften and spread the light when needed. A rainbow effect and auto-programmed chase effects provide added dynamic capability while a variety of other effects are possible via 0-100% dimming, a variable strobe and more.

Both Volt wash lights can be controlled via standard DMX, stand alone or via in-built programs while a blue and white LCD menu display with 4-button control panel makes for simple hands-on operation.
